To whom it may concern

CPRD is the sole supplier of Vienna Test System (ART90) consulting services to DFSA (Previously Clover Milk Procurement). CPRD and its affiliates have been involved with DFSA/Clover for the past 25 years in one form or another. The services include supplying hardware, test systems and software. Test analysis and reporting, and assisting with training and accident investigations.

The CPRD team has proven to be reputable, and highly skilled. We have been using their services as part of our driver screening process with great success. Since starting the ART 90 program we have seen a significant reduction in driver related accidents and incidents. In our opinion, the correlation between identifying the “right person for the job” and the ART 90 recommendation after testing, is as high as 98%. We have had a very low failure rate of drivers after employment that have been screened with the assistance of CPRD.

CPRD has always been on the forefront of research and development of psychomotor assessments and profiling. They have been actively involved in the development, and application of norms for the South African environment.

I do not hesitate to recommend CPRD to any role player in need of professional psychomotor assessments, advise or services.
